Problem

Dear Tiger Community,

Due to the ongoing construction of a new Interdisciplinary Science Building, new residential living halls, and more critical infrastructure for our university, Commuter Permits are currently sold out.

We understand this may be frustrating, especially since permits have typically remained available for longer periods in past years. This year's higher demand, combined with limited space, meant we had to cap sales earlier than usual to align permits with the number of commuter spaces available.

To help accommodate students, a Commuter Permit Waitlist is now open through your LSU Parking Portal. While signing up does not guarantee a permit, additional permits may become available throughout the semester.

01 Flooding and harsh weather conditions

02 Bus waits

03 Limited parking

04 No transportation

What is our solution?

A ride-sharing app that helps you connect with riders and drivers within your community.

Carpooling to class made convenient.
